

DigiKey

Company Announcement

Oct. 31 2023

We are extremely excited to announce that Digi key has become our official distributor. For the last 50 years DigiKey has grown to be one of the largest electronic component distributors in the world. DigiKey has a proven track record of being a premier electronics distributor and it is an honor they will be selling our devices. DigiKey will be a vital part of our business expansion and will be a crucial part in us acquiring new customers. While we have been working tirelessly at finalizing all our production devices, DigiKey has been a crucial part of getting us the electronic components we needed promptly.

On behalf of everyone at NuPhotonics, I just wanted to extend the sincerest thank you to everyone at DigiKey that was part of our onboarding process. They made the process so effortless and helped every step of the process.

We will work extremely hard at becoming one of DigiKeys' premier RF and Opto-Electronics suppliers, with a promise to deliver industry leading components and work at being at the forefront of new technologies.

Sincerely,

Vinny Gjokaj - Ph.D.

Founder
